PROFESSIONAL SUMMARY

Results-driven AI Software Developer with extensive experience in Python, Django, React, and LLM-based systems. Proven track record of building scalable full-stack applications, AI automation workflows, and multi-agent architectures. Expertise in API integrations, intelligent agent development, and deploying production-ready AI solutions. Strong background in machine learning, prompt engineering, and agentic AI workflows. Seeking AI Developer, Python Developer, or Full Stack Developer roles to leverage technical expertise in cutting-edge AI applications.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, Core Java, C, SQL

Frameworks & Libraries: React, Flask, Django, TypeScript, REST APIs, Scikit-Learn, Pandas, NumPy, Matplotlib

AI & Machine Learning: Large Language Models (LLMs), Multi-Agent Systems, Prompt Engineering, Machine Learning, Deep Learning, Natural Language Processing, AI Automation

Automation & Tools: n8n, Google Docs API, Google Drive API, Telegram Bot API, Workflow Automation

Databases: MySQL, SQLite, Database Design, Query Optimization

Core Competencies: API Integration, Cloud Deployment, Full-Stack Development, Software Development Life Cycle (SDLC), Agile Methodologies, Version Control (Git)

PROFESSIONAL EXPERIENCE

Full Stack Programmer

OM Intelligence, Nashik (Hybrid) | May 2025 – Present

- Developed and deployed scalable full-stack web applications utilizing Python, next.js, Flask and React, improving system performance and user experience
- Contributed to AI Leela platform by implementing Generative AI modules and machine learning-based features, enhancing product capabilities and intelligence
- Designed and deployed automation workflows using n8n, reducing manual operational effort by 40% and increasing team productivity
- Integrated Google Docs API, Google Drive API, and Telegram Bot API for seamless document automation and messaging workflows
- Collaborated with cross-functional teams to deliver cloud-ready, production-grade solutions aligned with business objectives

Research Intern

OM Intelligence, Pune | February 2025 – April 2025

- Built Python-based multi-agent systems for intelligent task automation, demonstrating expertise in AI architecture and agentic workflows
- Designed modular Super Agent, Domain Agent, and Output Agent architectures for complex decision-making pipelines
- Enhanced prompt engineering strategies and improved LLM response accuracy by 25% through systematic experimentation
- Conducted research on agentic AI workflows, contributing to innovative solutions in autonomous decision-making systems

Software Intern

Canspirit AI, Pune | May 2024 – July 2024

- Developed Python automation scripts to optimize internal systems, reducing processing time by 30%
- Assisted in debugging, testing, and improving system performance across multiple production-level codebases
- Collaborated with senior developers on code reviews and implementation of best practices in software development

KEY PROJECTS

AI Agent System – Multi-Agent Automation

Technologies: Python, LLMs, n8n, Google APIs, Telegram Bot

- Developed modular AI agent framework for YouTube video summarization and automated business plan generation
- Implemented product comparison automation with structured outputs, enabling data-driven decision-making
- Integrated Google Docs and Drive APIs for automated document creation, storage, and sharing workflows
- Enabled real-time task execution through Telegram bot-based user interaction interface

MovieMojo – Movie Dashboard Application

Technologies: React, TypeScript, Material-UI, REST APIs

- Built responsive movie dashboard with city-based filtering functionality and intuitive user interface
- Developed detailed movie pages and profile management features using React and TypeScript
- Integrated real-time movie APIs for dynamic content updates and implemented custom green-themed UI design
- Optimized application performance and ensured cross-browser compatibility

EDUCATION

Master of Science in Industrial Mathematics & Computer Applications

Nowrosjee Wadia College, Pune | 2023 – 2025

Relevant Coursework: Machine Learning, Artificial Intelligence, Data Structures, Algorithms, Operations Research, Statistical Analysis, Optimization Techniques

Bachelor of Science in Mathematics

Rajarshi Shahu College, Kolhapur | 2021 – 2023 | Score: 82%

Strong foundation in mathematical principles, analytical thinking, and problem-solving methodologies
